

■ SPECIALIZED SCIENTIFIC & TECHNOLOGY SOLUTIONS

Global expertise. Local purpose.

Connecting Oman's institutions with the scientific, security and specialist technologies that move their work forward.

■ ERASERHEAD LLC

A local understanding. A wider perspective.

Eraserhead LLC is an Omani company based in Muscat, focused on sourcing and supplying specialized technologies for government, healthcare, research and industry.

Our role is to connect international technologies with local needs through clear specifications, practical sourcing and responsive communication. We start with the application, then work through the details that make the solution fit.

■ SPECIALIZED BY DESIGN

Six connected areas. One point of contact.

Practical sourcing across the laboratory, the field and specialist operational environments.

01

Forensic science

Specialist tools and technologies for examination, identification and forensic laboratory workflows.

Forensic examination and imaging / Fingerprint development and visualization

02

Crime scene & evidence

Practical equipment for scene examination, evidence collection, documentation and secure handling.

Scene illumination and documentation / Evidence collection kits and consumables

03

Law enforcement & security

Specialized technologies and equipment selected around the needs of law enforcement and security teams.

Inspection and detection technologies / Operational and protective equipment

04

Laboratory & medical

Scientific instruments, medical equipment and essential supplies for laboratories, healthcare and education.

Analytical and research laboratory equipment / Medical and clinical equipment

05

Medical simulation & training

Patient simulators, clinical skills trainers and teaching equipment for healthcare education and practical training.

Patient simulators and training manikins / Clinical skills and procedural task trainers

06

Environmental & field solutions

Equipment for environmental monitoring, agriculture, natural resources and work in demanding field conditions.

Environmental measurement and sampling / Agricultural and natural-resource applications

Equipment selection and availability depend on the application and agreed specifications. Installation, training and support are defined for each project.

■ WHO WE SERVE

Essential work. Specialist requirements.

01

Government & public safety

Specialized equipment for public institutions, law enforcement and teams responsible for safety and security.

03

Universities & research

Scientific instrumentation, teaching equipment and practical resources for learning and discovery.

05

Agriculture & environment

Field technologies and scientific tools for agriculture, water resources and environmental applications.

02

Healthcare & medical education

Medical, laboratory and training requirements for hospitals, healthcare institutions and professional education.

04

Energy, mining & industry

Specialist measurement, inspection and field equipment for technical and industrial environments.

06

Medical simulation & training

Simulation equipment, clinical skills trainers and teaching resources for healthcare professionals, medical education and practical training.

■ HOW WE WORK

01 Understand

Start with the application, operating environment and technical requirements.

03 Coordinate

Bring specifications, documentation and delivery requirements together.

02 Source

Identify suitable equipment and compare options against the brief.

04 Support

Agree the handover and any product-specific training or support required.

We agree documentation, delivery, handover and any product-specific support as part of each requirement.

■ RELATIONSHIPS THAT CONNECT OUR WORK
